

Universal SubWoofer Wireless Kit

USER MANUAL

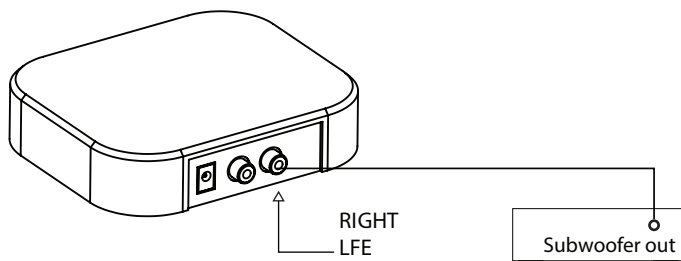

RECEIVING UNIT

TRANSMITTING UNIT

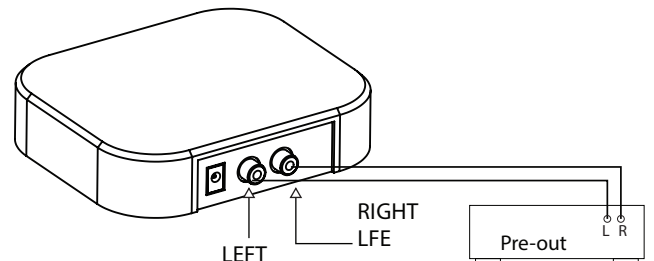

Plug the 5 Volt supply into the transmitter.

Connect to the LFE input

When a multi-channel audio/video amplifier is used, the transmitters single LFE input should be connected to the "Subwoofer" output on the audio/video amplifier. This connection refers to LFE IN or for single amp output.

Connect low level RCA inputs

When a 2-channel amplifier with pre-out line outputs is used, The transmitting unit must always be connected using the RCA stereo Right/Left inputs.
